LESSON 19. HUMAN GROWTH AND DEVELOPMENT

Students will be able to:

- **[KH1.1 - KH1.2 - COM2 - R4 – W2d]** Practice to pronounce – write and make sentences with vocabulary in topic human growth and development.

VOCABULARY

.

No.	English term	Pronunciation	Vietnamese term
1	Foetus/Fetal	/ˈfiː.təs/ /ˈfiː.təl/	Bào thai / Thuộc bào thai
2	Infancy	/ˈɪn.fən.si/	Giai đoạn sơ sinh (0-1 tuổi)
3	Toddler	/ˈtɒd.lər/	Trẻ con tập đi
4	Childhood	/ˈtʃaɪld.hʊd/	Thời niên thiếu
5	Adolescence	/ˌæd.əˈles.əns/	Tuổi vị thành niên
6	Puberty	/ˈpjuː.bə.ti/	Tuổi dậy thì
7	Teenager	/ˈtiːn.eɪ.dʒər/	Thanh thiếu niên
8	Adulthood	/ˈæd.ʌlt.hʊd/	Tuổi trưởng thành
9	Elderly	/ˈel.də.li/	Người cao tuổi

VOCABULARY IN CONTEXT

Human growth and development:

<u>Fetal stage</u>: 9 months in womb

The fetal stage occurs within the mother's womb and is the first step in human growth and development. After spending around nine months in its mother's womb, a baby will be born.

<u>Infancy</u>: 0 – 1 year old

At this stage, the infant is still very dependent on its mother, but it can now breathe independently, and cry when it feels hungry, cold, hot, or generally uncomfortable. An infant cannot speak.

<u>Toddler:</u> 1 - 12 years old

The next stage of growth begins at the infant's first birthday, when it officially becomes a toddler. At this point, it has entered *<u>childhood</u>*. Throughout childhood, kids are constantly growing

and learning new skills, such as walking, talking, and eating on their own.

Adolescence: 12 – 19 years old.

At this stage, kids become teenagers. Puberty takes place at this point in human growth. It takes place at different times depending on the person, but generally occurs from 13 to 19 years old. During puberty, growth takes place at a rapid rate, and the body goes through significant external and internal changes.

Adulthood: 20 – 65 years old

Within this stage, divisions can be made: young adults are 20 to 36 years old, middle-aged adults are 36 to 55 years old, and older adults are 55 to 65 years old. This is the most independent stage in human growth so far. It is at this point that people usually begin to reproduce and have children of their own.

Elderly: > 65 years old

This stage lasts until death, and so can vary in terms of length. This is the very last stage of human growth.

Talk and Write About It

1. The period from 0 to 1 year old is called _____.
2. The period from 1 to 12 years old is called _____.
3. The period from 12 to 19 years old, when kids become teenagers and go through puberty, is called _____.
4. The period from 20 to 65 years old, when people are most independent, is called _____.

PRACTICE

PART A. QUESTIONS

1. (DOK 1) What are the stages of human development. Look, read and write.

dolescent **baby** **adult** **child**

1. They are between 10 and 17 years old. ----------
2. They go to school, and they have lots of energy. ----------
3. They are between one day old and two years old. ----------
4. They go to work every day. ----------
5. Which stage are you? ----------

2. (DOK 1) Match the picture with the corresponding stage.

- Child
- Teenager
- Elderly

- Baby
- Adult
- Toddler

3. (DOK 1) Write the correct order. Use numbers from 1 to 6.

4. (DOK 2) Do the word search

Adolescence	Adulthood	Childhood	Development	Elderly
Foetus	Growth	Infancy	Life stages	Puberty

5. Circle three ways you will develop in the next ten years.

I will get taller.

I will get stronger.

My hair will turn gray.

I will become an adolescent.

I will become an infant.

6. (DOK 2) Read and match the parts of the sentences.

1. Some adolescents…	we reach maturity.
2. Adults stop…	to resemble adults physically.
3. Adolescents begin…	learn how to drive.
4. Adulthood is when…	growing taller.

7. (DOK 2) Reading in science.

Hannah and Mason introduce themselves to a new next-door neighbour.

Hello, I am Hannah. I am married and we have 3 children: Liam, Mason, and Charlotte. I work as a teacher.

Hi! I am Mason. I am 8 years old. I have a brother and a sister. I go to school.

- **Which stage of human growth and development is Hannah in?**
  a. Elderly. b. Adolescence. c. Adulthood.
- **Which stage of human development is Mason in?**
  a. Infancy. b. Adolescence. c. Childhood.

****Read the text and circle T (true) or (F (false).**

HUMAN DEVELOPMENT

When human babies are born, they look a lot like their parents. They are also different from their parents. Babies are very small. They cannot feed themselves or walk like their parents can.

Each of us grows and changes throughout our lifetime. This process is called development. These changes include physical changes, which are the changes to our bodies. The way our brains work also changes. These changes are called mental changes.

The four **main** stages of human development are infancy, childhood, adolescence, and adulthood.

1. Babies don't look like their parents. **T / F**
2. Physical change are changes to our bodies. **T / F**
3. Babies need to learn how to feed themselves. **T / F**
4. Children's brains work the same way as a baby's brain. **T / F**
